

# รายงานประจำปี 2564 Annual Report 2021

A loving home for every child

## Message from National Director

From the beginning of 2020 until 2021, it is a period of two years that everyone had to face hardships in life amid the Covid-19 outbreak, including working to help children who had lost parental care, in SOS Children's Villages Thailand as well. Since last April, all children and staff in SOS Children's Villages Thailand were limited to living in SOS Children's Villages to reduce the risk of infection. Every SOS Children's Village therefore had measures to take care of them strictly for the safety of children's lives as much as possible.

In this situation, we are aware of challenging economic conditions. Therefore, we have planned to concisely spend in caring for 700 children in five SOS Children's Villages across Thailand, along with taking this opportunity to educate the children about cost saving, such as growing home-grown vegetable for their own consumption, making dishwashing liquid, ways to save water/electricity, etc. The children will not only continue to live their life but will continue to gain life skills.

“  
The children will  
not only continue  
to live their life but  
will continue to gain  
life skills  
”

In order to pass on the care to you, we would like to provide a mask strap for you to use. Finally, I would like to thank the kind-hearted people who are still by the children's side with continuous support to give them a chance to grow up in love and in a safe environment and I wish you and everyone in Thailand a good health and ability to go through this event well.

Best regards

(Mr. Phahol Trangkineenad)

National Director

SOS Children's Villages Thailand

## Covid-19 and SOS Children's Villages

### Covid-19 situation that lasted a long time

It affects the SOS family in many ways, including everyday life that forces us all to change and set up measures that take into account the safety of everyone in the community of SOS Children's Village as a top priority.

### Measures to prevent covid-19

Set up a screening point in front of SOS Children's Villages; prepare medicines, medical supplies and provide knowledge to defend and protect.

### Life to be changed

What has been changed obviously is that everyone has to adjust their lifestyle to get used to wearing a mask, washing hands regularly to keep them clean, including distancing from others.

## Covid-19 and SOS Children's Villages

With the economic situation that affects everyone, Mothers and children had to help each other to grow vegetables to reduce the burden, expenses, reduce stress and also gain knowledge with them.

At the time the children could not go to school, they all had to study online. There may be some difficulty but all the children are willing to study very well.

**Since the middle of last year**

Mother and children in five SOS Children's Villages have gradually received vaccination against COVID-19 according to government measures.

*I would like to thank all the kind-hearted people for their continuous support enabling all children to grow up safe in a crisis like this. We wish you all safe. #We will pass it together.*

## Operations in the year 2021

financial support has not only helped provide food, clothing, health and education, but you also have provided every child a loving family, a warm and safe home, helping cultivating all children to become independent and self-resilient adults in society. Especially in the past year, in addition to taking care of the basic needs The SOS family was also trained to adapt itself to the COVID-19 situation that is still spreading for the good physical and mental health of everyone in the SOS family.

A total of  
**701**  
Children &  
Youth  
under our care,  
from all **five**  
SOS  
Children's  
Villages

Statistics until 30 September 2021

### Childcare care expenses

Referred to data from year 2020

Direct cost of child support accounts for 52% of the total running cost.

## Plan in the year 2022

\*Photo taken in 2020

SOS Children's Villages Thailand still commits to providing a family-like care for children who lost parental care by emphasizing the quality of care in a Child Safeguarding; safe and secure environment for children and youth in growing, especially giving a precedence to mental health of children, youth and SOS mothers-the caregiver, whom must be given special attention and care to make this place a "Loving home for every child" for today and in the future.
